

## Zedi SCADA

Industrial quality remote monitoring and control at consumer prices. We've brought our innovative thinking, platform and proven success into AgriFoods, CleanTech, Food Service, and many other industries.

Zedi has built a secure, scalable cloud-based Platform over the last 18 years. The platform is a combination of proprietary technology integrated with world-class technology from leading companies

### Sensor

Connect to a device, or asset that detects or measures a physical property and records, indicates, or otherwise responds to it

### Network & Storage

The network is a mechanism for communication for electronic signal (examples: cellular, satellite, LPWAN). Storage is the retention of retrievable data on a computer or other electronic system (the cloud)

### Big Data Analytics

Analytical tools which can describe, interpret, predict reaction from the input data

Our platform is a truly end-to-end. Sensors in the field are connected to gateways that support a variety of protocols. This has allowed us to help farmers by providing a real time, aggregated view of their crops. We've increased restaurants and food service chain profits by allowing them to better manage inventory and machine up-time. We've also collected, analyzed and provided feedback from wind turbines, solar thermal systems, photovoltaic panels, and battery storage systems to increase CleanTech energy production.

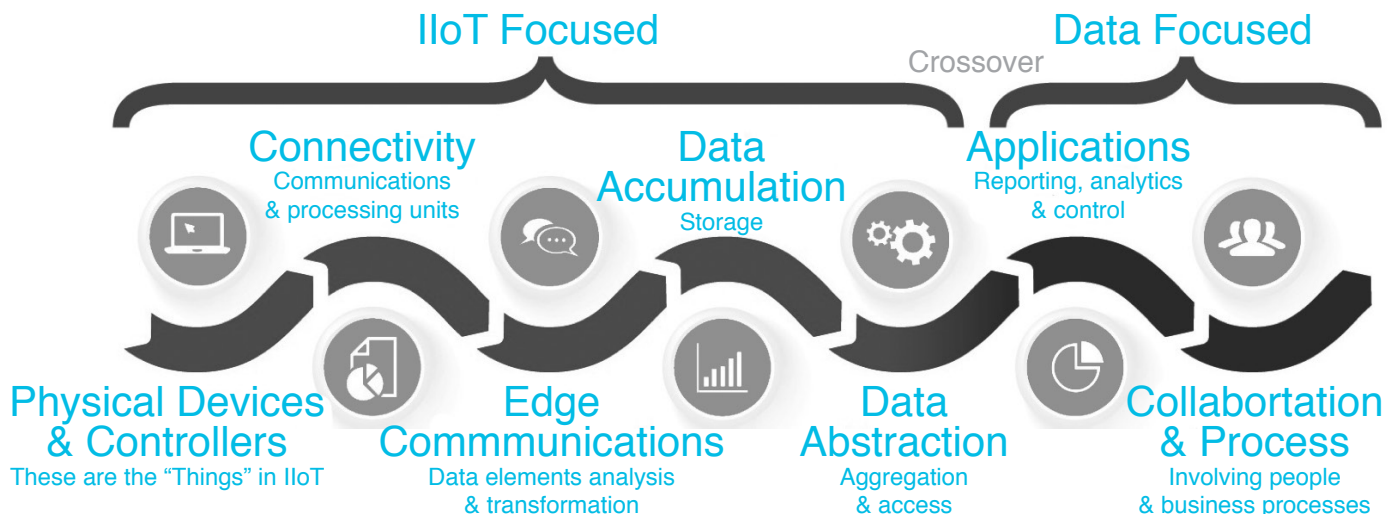

We simplify the connection between sensors to get you the data you need to make better business decisions. The platform exposes both a web interface to end users, as well as the ability to push data to third party platforms.

**40**  
Countries  
worldwide

**53**  
million daily  
readings

**6500**  
users every  
day

Zedi has adopted the ISO27001 Information Security framework, and utilizes a risk based approach to continuously review, assess and remediate risks associated to our systems and client data. This provides encrypted communication between our platform and any field device, real-time customer data backups, active monitoring of health of all services, and geographically disperse failover processing capability.

Zedi is a leading technology and services company in the field of production operations.

Through technology backed by expert consultation and services, we help our customers realize their production potential. Our unique combination of award-winning software, automation, measurement, labs, artificial lift and field services offer complete solutions for the challenges our customers encounter.

## Software Solutions

Simplify and scale your business process with Zedi's secure cloud infrastructure

- Create efficiencies and scalability
- Reduce operating cost
- Improve accuracy and timeliness
- Optimize Production

## Automation Solutions

Zedi practically started the IIoT revolution with our vision, exploration and innovation

- Custom Engineered Solutions
- IIoT Expertise
- Control and Optimization
- Solution to deliver results
- 24/7 Customer Care

## Measurement Solutions

Safe and reliable field experts backed by technology

- Loaded with safety
- Backed by technology
- On and Off-shore Expertise
- Integrated Lab Data

## Lab Solutions

Fast & accurate, on-site lab services backed by technology

- We do it all, everywhere & fast
- On-site abilities with 9 Labs
- Backed by technology
- Expert Project Management

## Artificial Lift Solutions

Get the most from your reserves with well site intelligence

- Best in class Service
- Accelerated production
- Optimized performance
- Wellhead intelligence

## Field Solutions

Decades of safe and reliable field experience

- Expertly Trained
- Cost Flexibility
- Best in Class Ops
- Loaded with safety
