Increase Safety with Tank Monitoring and Control

Zedi Cloud SCADA Solutions
Effortlessly integrate data from any source to rapidly enable better business decisions while increasing production, profits and sustainability.
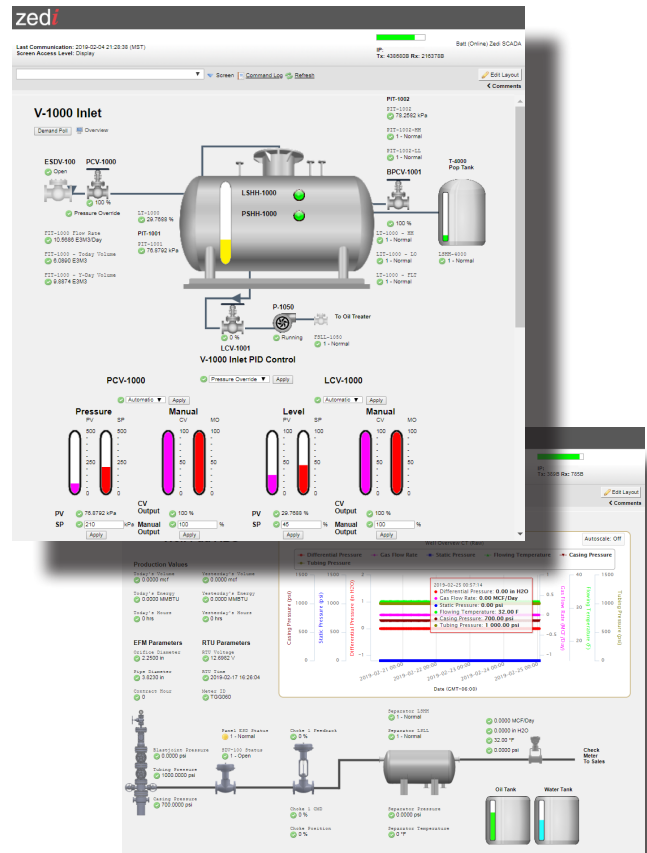

EMERSON.

Rapidly realize your production potential through cloud analytics, machine learning and mobility.

Getting end-to-end production data in real time from every sensor in the field is the key to optimizing your operations. Now you can provide your staff with secure, real-time, easy-to-read production data – anytime, anywhere. Driving stronger business decisions at every level.
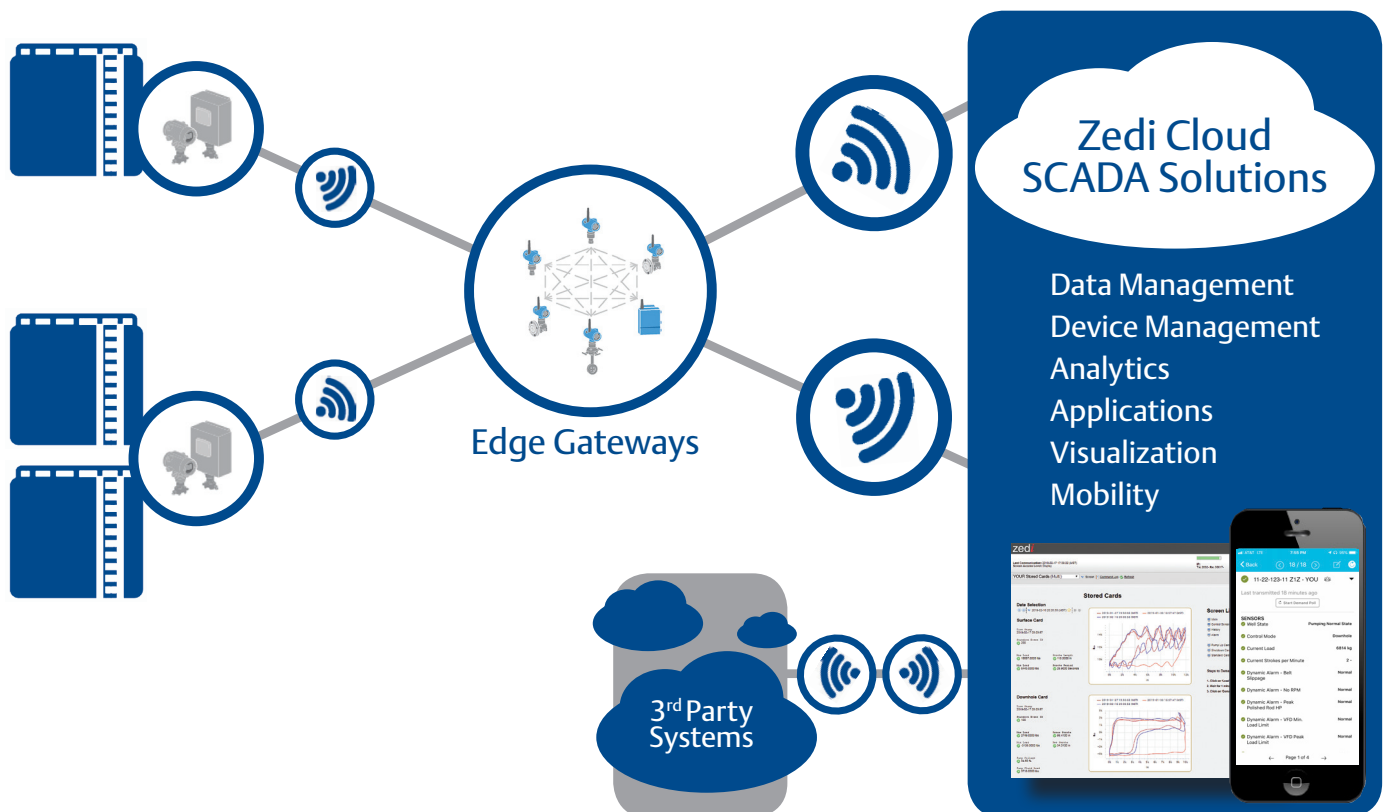

Emerson's secure, scalable Zedi Cloud SCADA Solutions enable producers around the world to compile data from any digital monitoring hardware via gateways that support a variety of protocols.

We provide end users with a web interface, as well as the ability to push data to third party platforms, allowing remote control and optimization via cloud-based data access.

Discover how our Cloud SCADA Solutions will help you better understand big data with vivid analytics while providing greater mobility.

Monitor & control tanks in the field – anytime, anywhere.

Tank Monitoring and Control

Anywhere, anytime access to tank data to reduce site visits, increase safety, uptime and profitability.
Quickly automate your tank levels and volumes with cry-out alarms for any problems that may arise, while backed by expert 24/7 service to increase safety and productivity and to know if your tanks are leaking, spilling or need maintenance and affording you to accurately schedule truck outs and ticketing.

- Reduce site visits
- Increase productivity
- Reduce downtime
- Increase safety

Efficiently monitor and manage tank levels and volumes

Clear and easy to understand real-time tank level data for visibility to increase safety without tank climbing to check levels manually.

User-friendly calculated tank volumes to reduce human errors with accurate cloud data available to permissioned users to better communicate across your entire organization; from field to office, and everywhere inbetween.

Cry-out alarming at designated set points to notify you when thresholds are met to avoid spills or other hazards avoiding costly and damaging results.

Vivid reporting & trending to increase your operational effcienties and eliminate costly, time consuming and unneccesary trips to site.

Flexibility from one remote tank location to multiple across the globe with ability to easily add newly aqcuired tanks at anytime in any location.

Software as a Service

Unlock the most value from your data with our SaaS cloud-based solutions.
Easily and seamlessly access current, user-friendly data for real-time, accurate decision-making production gains. Our software applications are built for producers and are delivered as a service to ensure evergreen enhancements, secure storage and full support. Increase profitability and operational excellence with our software solutions for better performing assets, streamlined compliance, and optimized resources.

Acquire, manage, and analyze your production data while ensuring compliance

- Unlimited users, no seat or site licenses required
- 24/7/365 customer support
- Application upgrades
- User training

- Access anytime, anywhere
- Mobile app Zedi Go
- Business continuity
- Infrastructure management

Get fast automation up and running in weeks

Our best-practice production automation solutions are ready to install now, gaining you the data needed to make better business decisions. Easily explore automation options, and then quickly do.
