

New 'Current Alarms' page for Zedi Go, the smartphone app

We've now included our current alarms page in Zedi Go. See below the icon newly added to access your current alarms page. The tally/count for alarms will be based on what locations (run/route) are selected. For a total alarm count please have all locations selected.

Easily identify current alarms by clicking the bell in the top right hand side of the screen.

Did you know Zedi Go has 10 data entry screens?

From truck ticket entry, to tank levels, to stroke lengths, to orifice plate changes and site notes... What are you still writing down manually? Please let us know, or if you would like a 10 minute tutorial of these features please contact Customer Care at 866.732.6967.

 Keep Go-ing... with Zedi Go
