

EPA Section 114 Request

We help you meet requests quickly and professionally with our team that is experienced with California Air Resources Board (CARB) protocols referenced in EPA requests.

Here is how we can help you:

- Help you interpret and understand the request
- Provide you with a protocol that can be submitted to the EPA
- Technicians for collecting samples in the correct sample containers (i.e. double valve cylinders and floating piston cylinders)
- Create and manage all sample documentation
- Analyze samples according to test requirements with fast turnaround
- Provide reports in format requested by EPA

Fast and accurate, on-site lab and field services combined with market leading technology enables our customers to meet demanding objectives with the trustworthy service of a friend, and the technology of tomorrow.

Technology

Innovative hardware with easy-to-read data

Artificial Lift

The next generation of lift solutions

Field Services

Decades of safe and reliable field experience

Zedi is a leading oil and gas technology and services company in the field of production operations. We help the world's oil and gas producers be more productive, more profitable and more sustainable. Through technology backed by expert consultation and services, we help our customers realize their production potential.

Our 60 years of continuous operations in North America and recognized as one of the industry's best workplaces sets us apart in the production operations landscape. With our unique combination of award-winning automation, data management and field and professional services, we offer complete solutions for the challenges our customers encounter.
