

ZEDI ROUGHNECK RELEASE

ZEDI ROUGHNECK ENHANCEMENTS

Gain more insight to our new enhancement to Zedi Roughneck. Zedi continues to improve the platform based on the feedback that you have provided. We are always looking for ways to make your user experience and work processes better.

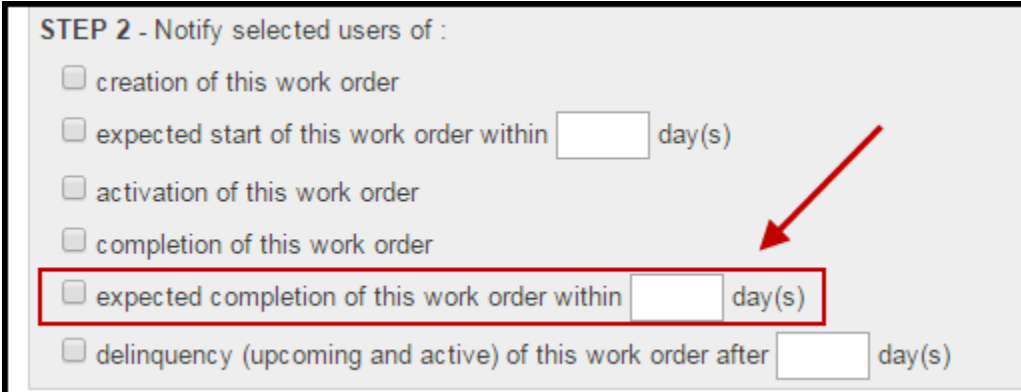

What's new in Zedi Roughneck?

1. Expected date of Completion for a Work Order Email.
2. Work Order Calendar export.

How do you utilize this update?

Expected date of Completion for a Work Order Email

When setting up a new work order, you now have the option for a notification be sent out for when the particular work order is expected to be completed. This new option can be found when creating a new work order under the Email Notifications section.

STEP 2 - Notify selected users of :

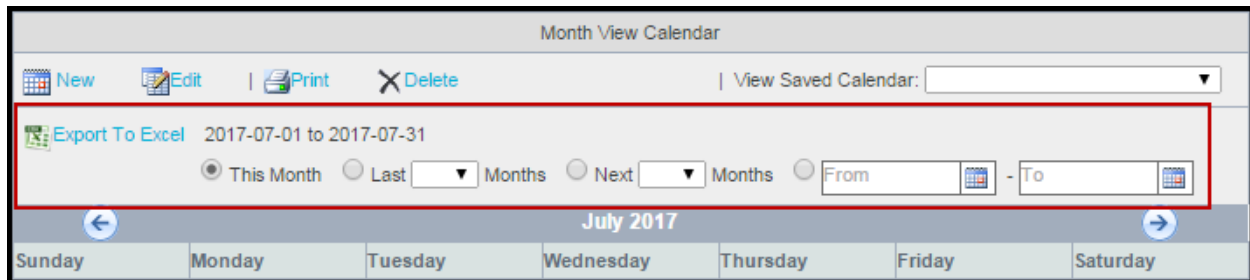

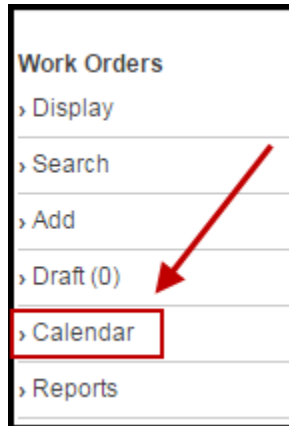

- creation of this work order
- expected start of this work order within day(s)
- activation of this work order
- completion of this work order
- expected completion of this work order within day(s)
- delinquency (upcoming and active) of this work order after day(s)

This new notification allows for your organization to have the ability to flag when work orders are supposed to be completed. This will be creating a more reliable and accountable work flow for you and your team.

Work Order Calendar export

Users now have the ability to quickly export the work orders directly from the monthly calendar page. This export can be pulled for the following: current month, previous months, future months and specific date ranges.

To access the new export, users have to enter the Work Order module and select Calendar.
