

ZEDI ACCESS TACTICAL RELEASE

ZEDI ACCESS ENHANCEMENTS

Gain more insight to our new enhancements to Zedi Access. Zedi continues to improve the platform based on the feedback that you have provided. We are always looking for ways to make your user experience and work processes better.

What's new in Zedi Access?

- True Chart customers – To improve data accuracy, the Well Site Display now reflects the time and date of the most recent transmission for Oil Well Tests.
- Multiple enhancements in preparation for the new Zedi Go Data Entry feature to be released on August 9th.

When is this happening?

- July 24, 2018

Where can I find this change?

1) True Chart Oil Well Test Date of Last Transmission

When there is new oil well test created for a True chart location, the well site display is updated to reflect the oil well test's creation time. Previously, the Well Site Display did not reflect the most recent transmission for oil well test creation. (See below.)

Before update:

TC_WELLTEST_SAT06
 UWI: 100072104007W406
 Device Type: Zedi TrueChart (Online)
 Serial Number: TC_600006
 Last Transmission: 2011-06-05 02:00:00 (MDT) ←
 Orifice Plate 1.111 in
 Zedi Id 229418

Sensors

- Estimated Differential Pressure No Reading
- Estimated Flowing Temperature No Reading
- Estimated Gas Flow Rate No Reading
- Estimated Hours On No Reading
- Estimated Static Pressure No Reading
- Estimated Volume No Reading

After update:

 Last Transmission: 2018-07-16 14:19:36 (MDT)
 Orifice Plate 1.111 in
 Zedi Id 229418

Sensors

- Estimated Differential Pressure No Reading
- Estimated Flowing Temperature No Reading
- Estimated Gas Flow Rate No Reading
- Estimated Hours On No Reading
- Estimated Static Pressure No Reading
- Estimated Volume No Reading

2) Enhancements in Zedi Access integrated with Data Entry and Zedi Go

Users may notice some new features in Zedi Access. For example, a new Data Entry option will appear in the site menu drop down list. This option is connected to the new Data Entry feature in Zedi Go – set to be released August 2018.

Please note

The functionality of these options will be limited until the Zedi Go August release.

Data Entry Coming to Zedi Go August 2018...

- Customers may use pre-set data entry screens or custom configured screens based on data points that are relevant to their own dataflow.
- Allows offline data entry
- Works for any location in Zedi Access.
- Sync data between the app and Zedi Access – data moves in both directions to display the most up to date data on either platform.

If you have any questions about this update please contact Zedi Customer Care at support@zedi.ca or 1-866-732-6967.
