

Maximize uptime and reduce your operational costs of your equipment

## Zedi Roughneck

Cloud-based fixed asset management system to help increase safety, profits and sustainability.

## Zedi Roughneck for Optimized, Anytime, Anywhere Access and Control of Fixed Assets

Maximize safety and uptime while you reduce your operational costs by optimization and control of your field equipment with Zedi Roughneck Software.

This advanced Health, Safety and Environmental (HSE) solution enables operators to monitor and maintain all fixed assets in a single system.

Better insight provides operators the opportunity to implement stronger preventive maintenance practices to prevent downtime and unnecessary spending while reducing staff time in the field and improving compliance with HSE requirements.

This software includes several unique modules that can be used individually or in combination to improve efficiencies across your operation.

## Streamline Work for Fixed Assets, Preventative Maintenance and Health, Safety, and Environment

- Add, edit, track and report on equipment with visibility to the status and condition
- Schedule work orders for proactive repairs & easily set reminders with escalations
- All equipment can be linked to a location and a preventative maintenance schedule
- Report maintenance activity for audit trail
- Review, approve and documentation of change request and compliance
- Manage pipeline inventory and license programs, track incidents, procedures, specs & safety manuals
- Attach documents, pictures, and checklists to each piece of equipment
- Move and transfer equipment from one location to another with all historical data
- Create maintenance schedules for equipment, and locations status notices

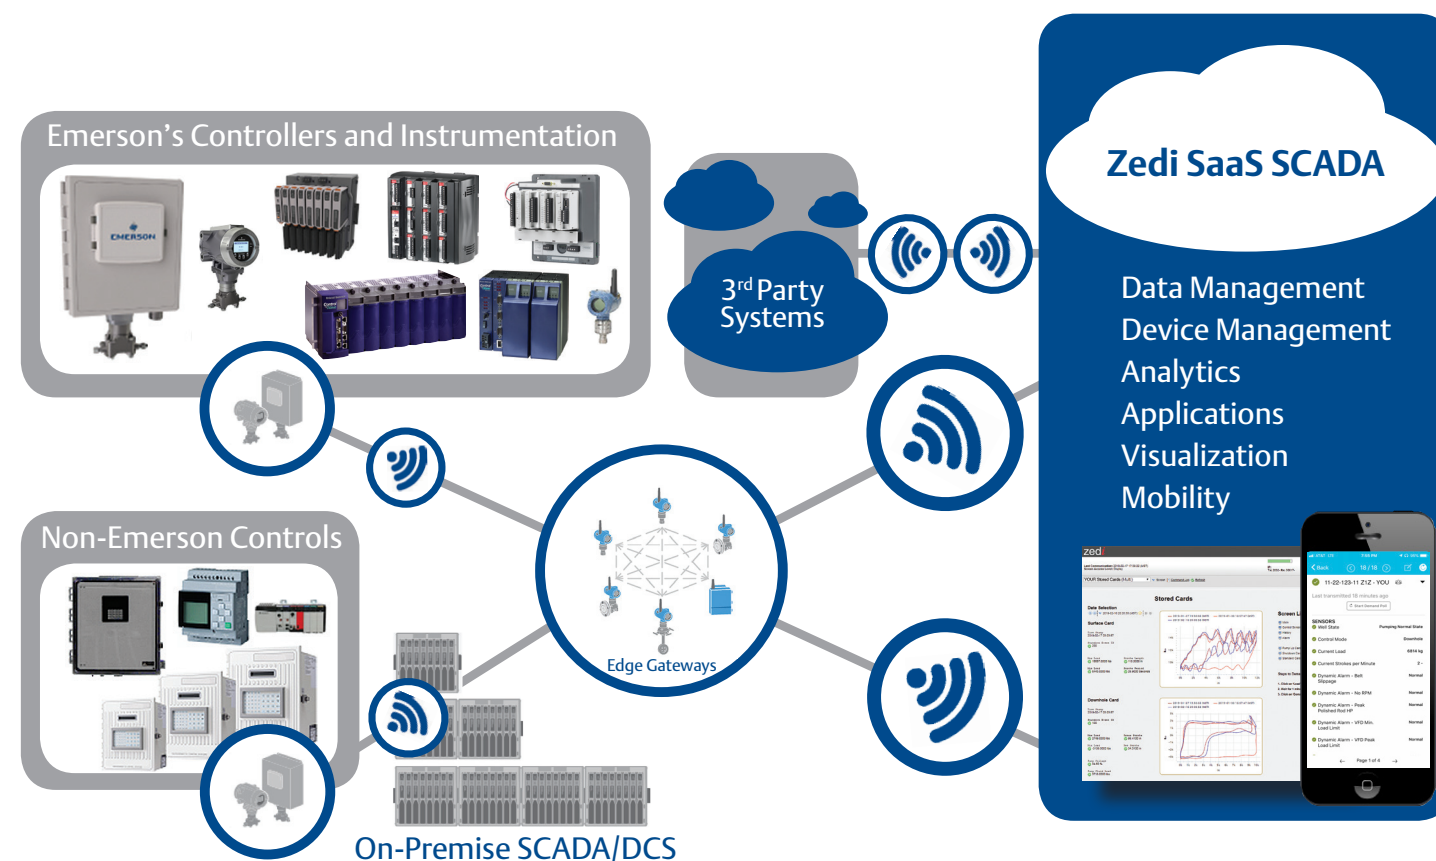

**Effortless, always up to date software enables you and your people to better focus on more impactful business decisions**

Our platform is built for anything under the industrial sun. You may even decide to layer our SaaS SCADA onto your own current system to help make your team more mobile, as a secondary system for a transitional time-frame until your people are comfortable using a new system, or even as a secondary back-up to add another layer of security in the event your in-house system fails.

**Our SaaS is hardware agnostic, which means you can utilize the hardware you may already own, and still get decision making data**

You decide on what sensors and hardware equipment are best suited for your situation. All you do is tell us what you want for data and analytics to be reported and we'll do the rest—in just a few days. This delivers your people with the actionable insights they need to make better operating decisions quickly and efficiently.

## Monitor & control assets in the field – anytime, anywhere.

### Software as a Service

Fuel the power to unlock the most value from your data

Easily and seamlessly access current, user-friendly data for real-time, accurate decision-making gains. Our software applications are built for industrial challenges and are delivered as a service to ensure you effortlessly always have the most up to date version, security and full support. Increase safety, profitability and operational excellence with our software solutions for better performing assets, streamlined compliance, and optimized resources.

**Acquire, manage, and analyze your operational data while ensuring compliance**

- Unlimited users, no seat or site licenses required
- 24/7/365 customer support
- Effortless application upgrades
- Complete user training
- Secure anytime, anywhere access
- Data center
- Business continuity
- Infrastructure management
