Intelligent visual surveillance to remote assets in the field

Zedi Video Surveillance
Strengthen site security and enable
faster response time and increased safety

EMERSON

Know Exactly What is Happening at Site From Anywhere, Anytime

Visual monitoring and analytics enables you to confirm field assets are operating properly with Zedi Video Surveillance, while strengthening security and delivering faster response time.

Gain ability to monitor site activity, safety compliance, and environmental assessments without requiring personnel on site.

Visualize your production assets in the field for up to a 50% increase in team productivity, topped off with the added gains of security, safety and operational confidence to bring your fields to higher profits.

Intelligent visual surveillance to remote assets at your site with industrial grade, weatherproof enclosure ensures reliability with quality of installation available in most locations. Reduce field visits, manage by exception, and confirm field alarms quickly and easily, reducing operating costs.

Keep Go-ing... with Zedi Go

Enter, Monitor and Manage Your Operations from Anywhere, Anytime with our Mobile App.

In the field or simply away from a computer, easily access and input valuable operational data, create custom forms, instantly update systems, and directly control your devices through our mobile app, Zedi Go.

Reduce Site Visits with a Scalable Cost Effective Solution
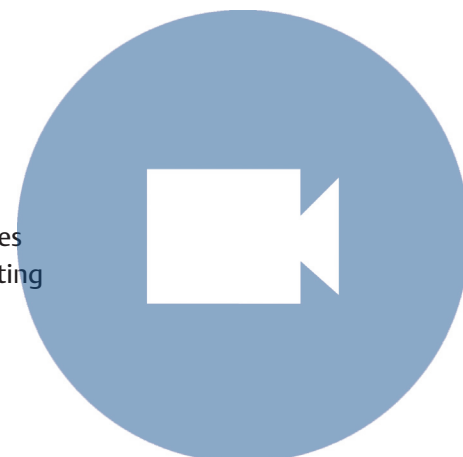

Manage by exception through visual analytics
- Analytics based visual alarms
- Increase response time to site dangers, issues and exceptions
- Asset images provide actionable information

Increase safety
- Reduce site visits by up to 50% saving time, money and resources
- Ensure work alone compliance, site security and incident reporting

Asset protection
- Respond quickly and effectively to production problems
- Increase site security and environmental incidents

Software as a Service

Fuel the power to unlock the most value from your data with our SaaS cloud-based solutions.

Easily and seamlessly access current, user-friendly data for real-time, accurate decision-making production gains. Our software applications are built for oil and gas producers and are delivered as a service to ensure evergreen enhancements, secure storage and full support. Increase profitability and operational excellence with our software solutions for better performing assets, streamlined compliance, and optimized resources.

Acquire, manage, and analyze your production data while ensuring compliance

- Unlimited users, no seat or site licenses required
- 24/7/365 customer support
- Application upgrades
- User training

- Access anytime, anywhere
- Data center
- Business continuity
- Infrastructure management

Automation as a Service

Get fast, pre-packaged, best-practice automation that's up and running in weeks, not months – or years! Automation as a Service effortlessly integrates automation in the field into accurate data to quickly deliver better business decisions, all backed by expert service from every angle.

Wellhead Solutions
- Tubing/Casing • ESD

Well Pad Solutions
- Single Well Battery
- Multi-well Battery

Artificial Lift Solutions
- POCs
- Rod Pump
- Plunger Lift
- ESPs
- PCPs

Gas Solutions
- EFM
- Charts

Liquid Solutions
- Coriolis
- Mag Meters
- Turbines/Totalizers

Facility Solutions
- Tank Levels
- Separators

SWDs, Compressors & more

Digitally transform your production operation by integrating a secure, scalable, end-to-end cloud SCADA, software and automation solution.

Join the Journey

Expedite your digital transformation journey to an autonomous oil and gas operation with Emerson's Zedi Cloud SCADA Solutions. Our proven hardware and software, backed by our team answers every producers need for stronger, long term returns. Our scalable solutions fit your project size and growth while increasing the reliability of your assets with improved focus on health, safety and environment.

Manage and optimize remotely to drive digital transformation in your operation

- Complete, clear data
- Easy-set smart alarms
- Predictive intelligence
- Self correcting optimization
- Continuously modulated control

- Exception based safety systems
- Zedi Access software
- Zedi Go mobile app
- 24/7/365 Customer Care
