Easily Integrate Your Data to Other Systems and Applications

DeltaV SaaS SCADA with Data Exchange

Efficiently schedule, automate your data to import or export to other applications to increase your safety, profits and sustainability.

EMERSON.

Moving your operational data to other applications can be scheduled, automated and easy

Emerson's secure, scalable DeltaV SaaS SCADA enables operations around the world to compile data from any digital monitoring hardware via gateways that support a variety of protocols.

DeltaV SaaS SCADA with Data Exchange enables the ability to push data to third party platforms and applications and is a service that will design and move your select data to other applications on a regularly scheduled and automated basis.

The Data Exchange process is fast and accurate with our experts initially doing a discovery analysis, project design and quote to ensure the end result is exactly what you and your people need, and that the data arrives on time, every time.

## Focus on Your Business, Not Your Platform

Our evergreen, cloud-based platform provides scalable and easily expandable advanced capabilities to your assets in remote locations that delivers easy to understand, decision making data and vivid analytics.

- Increase safety and productivity
- Reduce remote site visits & downtime

From one operational asset to multiple on a single location, all serviced by the same consolidated platform that can deliver the data you need to analyze performance, increase operational efficiency, maximize profits and promote sustainability.

Our cloud-native platform connects to anything under the industrial sun.

Our people are exceptionally committed to your success, driven by our customer first culture and foundational belief in supporting our customers and each other to deliver the most effective solutions that generate more safety, profits and sustainability.
