

Easy Monitoring of City Utilities with Zedi IIoT Platform

Effortlessly integrate data from any source to rapidly enable better, faster decisions

Manual inspections and outdated maintenance practices make it extremely difficult to recognize and mitigate potential risks. Gain data and visibility to level, overflow, vibrations, motion, volumes, in-line pressure, steam traps, temps, and more.

Zedi IIoT platform delivers operational data to authorized users at the remote site, in the truck, or at the office.

Hardware agnostic IIoT platform to quickly gain valuable industrial data insights for a variety of protocols to monitor remotely located assets that enable safer, smarter work-flows with flexible configurations and easy-to-use interface.

Quickly flexes for needs with always up to date SaaS that you can easily export your data and is complete with continuous robust development

Water Management

Maintain high quality water while monitoring performance of equipment and chemical dosage needs with alarms for level thresholds with actionable data to provide your team mobility and speed.

Treatment Plant Management

Advance your treatment plant with preventative maintenance based on historical data with alarms, authorized user data that is clear and accurate to access at anytime, anywhere complete with our mobile app.

Wastewater Management

Monitor, control and alarm pump locations, lift stations and even complex treatment centers with ease at anytime, anywhere with accurate, real-time data with level alarms to increase safety and operational efficiencies.

Natural Gas Distribution

Strategic pressure monitoring points throughout the distribution network with end of line pressures enables faster reactive measures. Remote knowledge of overpressure or underpressure events deliver more efficient response.

Heat Management

Improve heat equipment reliability and pro-actively maintain and react to machine health issues, and reduce failure rate of equipment that people in your cities depend on in cold climates to stay warm.

Chemical Management

Monitor and manage both granular and liquid road de-icer tank levels and flow rates and better manage your city mosquito control chemicals and methods with better measurement and more exact, safer level management.

End-of-Line Pressure Management

Liquid pressure management for end-of-line stations can vary in demand in your city, with difficulties for power along pipelines. Now easily gain access to supply disruption due to leaks with accessible monitoring and alarms.

Storm Water Management

Increase internal communications and community safety of municipality with remote visibility to storage ponds to mitigate hazards and containments of storm water storage based on remote data access to ponds.

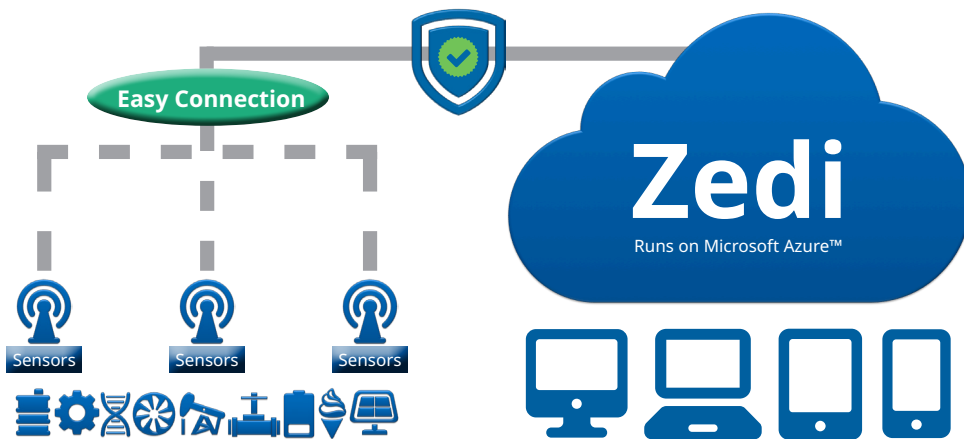

Cloud-native IIoT platform enables actionable data from anywhere, anytime

Natural Gas Distribution | Water | Wastewater | Heating | Chemical

Built for your operations and authorized users from around the world to gain accurate operational data with real time analytics for better business decisions.

- Give unlimited users authorized, role-based access
- Anytime, anywhere access with the Zedi Go mobile app
- Optimize operations with cry-out alarms
- Effortless always up to date software
- Easily push data to third party platforms
- Maintain business continuity with 24/7/365 support
- Quickly up-skill your staff with user training

Manage Assets

- Pipeline network & gate stations
- Regulator & odorization stations
- Pressure & flow control valves
- Measurement hardware
- Leak detection systems
- Allocation contracts

Manage Maintenance

- Monitor pressure
- Track & control flow
- Monitor measurement
- Monitor pipeline
- Manage stabilized pressure
- Manage repairs & maintenance
