

Accurate Automation with Speedy Installation

RESULTS

- Improved time management among employees
- Fast set up time and accurate detailed production data added focus
- Helpful, friendly support available them 24/7
- Cost-effective with significant reduction in operating expenses

APPLICATION

Emerson's Zedi Cloud SCADA Solutions platform, Automation Hardware and Automation Services

CUSTOMER

Large Producer in the United States

CHALLENGE

Our cloud-base platform and production automation is our focus and why we provide it as a service making it easier to explore automation options for company needs with a secure, flexible cloud platform.

Our new Customer was struggling with finding the time to plan new drills and getting production answers that were needed to react to daily pressures (both internal and external).

The producer needed to get several sites automated to deliver internal personnel the information required but didn't want internal resources absorbed in the process to procure, engineer, install or maintain.

The company wanted a quick turnaround for the automation of sites with instant access to decision making data. They needed accurate data and more time to focus on core business operations.

The customer called upon Zedi to help get their automation up and running without any headaches – or fiscal surprises.

“Having Zedi provide full platform, automation and services allowed for a sharper focus from internal resources on strategizing and achieving large-scale successful growth objectives and full attention targeted on new drill plans.”

Large Producer in the United States
- VP of Operations

SOLUTION

Automation installed in the field provided the accurate data to quickly deliver better business decisions, all backed by expert service from every angle made the whole process easy and fast.

Engineered for ease, accuracy, and speed without needing the attention of our customer's internal resources.

When this customer called Zedi to help with providing a solution to the automation problems they were having we stepped up with best-practice hardware, a secure cloud SCADA platform, and fast installation services to get it in the field and running smoothly; It was merely a matter of putting it all together fast and accurately.

Our customer has been using our Zedi platform in action now for the past few months with everything running efficiently. Our service has allowed for more internal focus on bigger goals like new drills, forecasting and so many other areas of their core business to protect production, profits and long term sustainability.
